OVERVIEW OF THE TEAM CAPACITY AND THEIR PLANNED CAPACITY

OVERVIEW	MEMBER	CAPACITY
Team capacity: 26h	Ancuta Andrei	75%
	Corbeanu Adela Nicoleta	50%
	Diaconu Mircea Stefan	50%
Planned capacity: 36h	Enescu Irina Stefania	25%
	Putinelu Bogdan Andrei	0%
	Udrea George Robert	50%

Member capacity legend:
- 0%: The team member has no availability to contribute to the project - fully occupied with other tasks
- 25%: Limited availability - the team member can allocate a small portion of their time to the project
- 50%: Moderate availability - the team member can dedicate a significant amount of their time to the project
- 75%: High availability - the team member has substantial time to contribute to the project but might still have other commitments
- 100%: Full availability - the team member is entirely dedicated to the project with no other conflicting commitments

SPRINT BACKLOG AT THE BEGINNING OF THE SPRINT

We've decided not to add new tasks in this sprint and instead focus on the remaining tasks from sprint 1, as we were already facing internal bottlenecks. Moreover, our roadmap allows for this adjustment, and we are still well within our planned timeline.

TASK	ESTIMATION	PRIORITY	STATUS	DEV TEAM	ASSIGNEE
Add login endpoint	3	High	In progress	Backend	Ancuta Andrei
Add patient login flow	5	High	In review	Frontend	Robert Udrea
Add ticket creation form	5	High	In progress	Frontend	Robert Udrea
Add ticket listing enpoint	3	High	To Do	Backend	Irina Enescu
Add patient ticket dashboard	5	High	In progress	Frontend	Corbeanu Adela
Add ticket details endpoint	3	High	To Do	Backend	Irina Enescu
Add patient registration endpoint	5	Medium	In progress	Backend	Ancuta Andrei
Add patient registration flow	5	High	In review	Frontend	Robert Udrea
Add ticket creation endpoint	3	High	In progress	Backend	Irina Enescu

SPRINT SPECIFIC USER STORY & ACCEPTANCE CRITERIA AT THE BEGINNING OF THE SPRINT

The table below only lists the user stories of the current sprint.

AS A ...	I WANT ...	SO THAT ...
Potential patient	to create a new account	I can manage my healthcare information
User	to log in to my account using my personal credentials	I can access and manage my resources
Patient	to create a medical ticket with my symptoms	I can consult with doctors about them
Patient	to view full details about a submitted ticket, including ticket information, the assigned doctor, and any responses provided	I can track its evolution
Patient	to access a ticket dashboard of created tickets categorized by their status (open, closed)	I can have an overview of ongoing and resolved medical concerns

ACCEPTANCE CRITERIA:

- As a user, I want to log in to my account using my personal credentials to access and manage my resources.

GIVEN the user wants to log in WHEN the user navigates to the login page AND the user provides valid credentials AND the user clicks the login button THEN the system grants the user access to their private resources AND the system redirects the user to their ticket dashboard	GIVEN the user wants to log in WHEN the user navigates to the login page AND the user provides invalid credentials AND the user clicks the login button THEN the system rejects the user's login attempt AND the page displays an error message

- As a potential patient, I want to create a new account to manage my healthcare information.

GIVEN the potential patient wants to create an account WHEN the patient navigates to the registration page AND the patient provides valid information for account creation AND the patient clicks the registration button THEN the system creates the patient's account AND the system redirects the patient to the login page	GIVEN the potential patient wants to create an account WHEN the patient navigates to the registration page AND the patient provides invalid information for account creation AND the patient clicks the registration button THEN the system rejects the patient's registration attempt AND the page displays an error message

- As a patient, I want to create a medical ticket with my symptoms so that I can consult with doctors about them.

GIVEN the patient has a health concern WHEN the patient navigates to the ticket dashboard AND the patient clicks the "New ticket" button AND the patient enters a description AND the patient selects a medical specialization AND the patient clicks the "Submit ticket" button THEN the ticket is successfully added to the specialization's ticket queue AND the page displays a success message to the user	GIVEN the patient has a health concern WHEN the patient navigates to the ticket dashboard AND the patient clicks the "New ticket" button AND the patient clicks the "Cancel" button THEN the ticket creation is cancelled AND the user is returned to the ticket dashboard

- As a patient, I want to view full details about a submitted ticket, including ticket information, the assigned doctor, and any responses provided, so that I can track its evolution.

GIVEN   the patient wants to view a ticket's details WHEN   the patient navigates to the ticket dashboard AND   the patient selects a specific ticket to access THEN   a popup opens displaying details for the selected ticket, including description, the assigned doctor, medical specialization, doctor's response, and attached documents

- As a patient, I want to access a ticket dashboard of created tickets categorized by their status (open, closed) so that I can have an overview of ongoing and resolved medical concerns.

GIVEN   the patient wants an overview of their created tickets WHEN   the patient navigates to the ticket dashboard THEN   the system displays a list of created tickets, categorized by their status (open, closed) AND   each ticket entry specifies details such as creation date, assigned doctor, specialization, and brief description

SPRINT REVIEW AT THE END OF THE SPRINT

SPRINT ACHIEVEMENTS	Almost the completion of the development of the login & registration process Working on the development of ticket operation The implementation of the ticket dashboard on the frontend

ITEMS THAT WERE ADDED AFTER THE SPRINT START	Nothing was added after the sprint start.
ITEMS THAT WERE REMOVED BEFORE THE SPRINT END	Nothing was removed before the sprint end.

NOT COMPLETE ISSUES				
ISSUE NAME	**STATUS**	**ASSIGNEE**	**ESTIMATION**	**SUMMARY**
Add ticket creation form	In progress	Robert Udrea	5	75% progress
Add ticket listing enpoint	To do	Irina Enescu	3	-
Add ticket details endpoint	To do	Irina Enescu	3	-
Add patient registration flow	In review	Robert Udrea	5	-
Add ticket creation endpoint	In progress	Irina Enescu	3	90% progress

In this sprint, we've taken over all the tasks that remained in to do, in review, and in progress stages from the previous sprint.

All tasks that remained at the end of this sprint in to do, in progress or in the review stages, we've decided to move them to the backlog for the next sprint. We won't be giving up on anything, as all tasks are crucial for the project's development.

COMPLETED ISSUES				
ISSUE NAME	**STATUS**	**ASSIGNEE**	**ESTIMATION**	**SUMMARY**
Add login endpoint	Done	Ancuta Andrei	3	-
Add patient login flow	Done	Robert Udrea	5	-
Add patient ticket dashboard	Done	Corbeanu Adela	5	-
Add patient registration endpoint	Done	Ancuta Andrei	5	-

SPRINT REMARKS	It was a good decision not to take on additional tasks. Instead, we focused on completing what remained from the previous sprint. The login and registration processes took a considerable amount of time, but they are now refined.

COMPLETED USER STORIES		
AS A ...	**I WANT ...**	**SO THAT ...**
User	to log in to my account using my personal credentials	I can access and manage my resources

NOT COMPLETE USER STORIES		
AS A ...	**I WANT ...**	**SO THAT ...**
Patient	to create a medical ticket with my symptoms	I can consult with doctors about them
Potential patient	to create a new account	I can manage my healthcare information
Patient	to view full details about a submitted ticket, including ticket information, the assigned doctor, and any responses provided	I can track its evolution
Patient	to access a ticket dashboard of created tickets categorized by their status (open, closed)	I can have an overview of ongoing and resolved medical concerns

NEW FEATURES	-
SPRINT IMPEDIMENTS	JWT login implementation Some members were blocked by tasks assigned to other team members

SOMETHING THAT YOU REALIZED THAT YOU HAVEN'T BEEN ABLE TO ACHIEVE	We've realized that we won't be able to complete all tasks as the login and registration implementation took too long and caused a bottleneck for the ticket-related tasks.
SOMETHING EXTRA YOU REALIZED YOU WERE ABLE TO ACHIEVE	We haven't identified any extra tasks or improvements that we could work on.

HOW CLOSE ARE WE TO DELIVERING THE FUNCTIONALITIES	We are very close to delivering the functionalities related to the account management feature: patients can create an account and login to an existing one & doctors can login to the account provided by the admin. We have made significant progress towards delivering the functionalities related to ticket creation.
HOW CLOSE ARE WE TO AN MVP	We are closer to delivering the MVP than in the previous sprint, now that we have functional login and registration functionalities.

SPRINT RETROSPECTIVE AT THE END OF THE SPRINT

WHAT WENT WELL?	WHAT WENT POORLY?
- We managed to make progress with delivering some important functionalities. - We, as teammates, were quick to address questions regarding the state of the tasks with no inhibitions. - The project progresses at a good pace. - Good collaboration between frontend developers. - We passed the first hurdle involving authentication.	- We find it challenging when tasks from our colleagues impede the completion of other teammates assignments. - Some colleagues couldn't work, but when a bug introduced by them was discovered, they resolved it themselves. - Someone was available less than we had expected (doesn't even responds to messages) and therefore the rest of the team needed to work harder. - Some misunderstandings between backend - frontend team. - Figuring out how authentication is done in Spring took more than expected.

WHAT NEW IDEAS DO WE HAVE?	WHAT ACTIONS WILL WE TAKE?
- To avoid bottlenecks. - We should be getting closer to the MVP from what I've seen, so keep it up! - We should stick to what we have planned because there is not much time left. - We are running out of time so we need to focus on the main feature of the app: tickets.	- Team members with tasks on which others depend will prioritize resolving them. - We will try to be more available in the following sprint. - We will plan smarter by communicating better. - Readjust timelines and work at a faster pace.
